GALLAGHER™

Invoice automation from **Procure-to-Pay** all the way through to **Cash Allocation**. Oh, plus full integration with SAP.

Reduced operator time by
40%

Powerful, purpose built machine learning
AI

OVERVIEW

A true kiwi business, Gallagher Group, provide the world with security and animal management solutions, since 1938!

A key focus for them has been ensuring work processes and technology kept pace with huge global growth. Handling 40,000 invoices a year without the right tools, manually reconciling payments and a lack of visibility was not the way forward.

Through a stringent RFP process, Gallagher quickly saw Esker was the solution. What really stood out to them was our local presence from project scoping and delivery all the way through to ongoing customer success.

Gallagher now have a constantly improving finance suite using AI, one that includes allocating cash as well as integrating everything with SAP. What's more, is they can now see exactly what's going on with intuitive analytics & customisable dashboards.

> FUJIFILM Business Innovation helped eliminate time-consuming manual tasks so our staff could add value in their work. They've been a true partner that's helping our Kiwi business take flight around the world.

Paul Moore, Finance Transformation Lead, Gallagher Group

SOLUTION

"Gallagher needed a solution to streamline their Procure to Pay and Cash Allocation processes, and **it needed to integrate with their SAP system**" says Al van Seventer, Consulting Team Lead, Fujifilm Process Automation.

As New Zealand's **local** Esker partner, we were 100% confident it was the right tool to deliver for Gallagher, both now and well into the future.

Our team worked closely with Gallagher, learning exactly how they work, then got stuck into implementing Esker Procure-to-Pay and Cash Application.

40,000 invoices a year are now processed through Esker and payments are allocated much **faster** with greater **accuracy**.

With Esker's purpose built **AI** at it's core, it's constantly learning and improving. can detect fraud and forecast payments based on previous activity & invoices in progress.

"It's a powerful system that delivers exactly what Gallagher needed to work smarter" says Al.

RESULTS

Custom, Real-Time Dashboards

Esker reduced operator time by 40%

Grown the business while maintaining staff levels

Each global cost centre now has full **Visibility**

We've reduced operator time by 40% since implementing Esker, meaning we can accomplish more with the same number of staff. We've been able to grow a number of transactional areas and grow our business while maintaining staffing levels.

Paul Moore, Finance Transformation Lead, Gallagher Group

WHAT'S NEXT?

Well, for Gallagher, their initial 40% process improvement will **continue to improve** with Esker's machine learning AI. Additionally, thanks to our **customer success programme**, our local experts will be right by their side, helping them get the most out of their solution.
